

**REP.
RUSH
HOLT**

Town Hall Meetings/Office Hours

www.holt.house.gov

I hope to see you at these upcoming meetings to discuss issues such as Social Security, economic development, hometown security, health care, education, and anything else that may be on your mind.

Saturday, October 29

Old Bridge Township
10:30 a.m. – 12 p.m.
Old Bridge Library
One Old Bridge Plaza

Saturday, October 29

Marlboro Township
1:30 – 3 p.m.
Marlboro Library
Library Court and
Wyncrest Drive

Sunday, November 13

Oceanport Borough
2 – 3:30 p.m.
Oceanport Borough Hall
222 Monmouth Blvd.

Monday, November 21

Delaware Township
7 – 8:30 p.m.
Delaware Elementary School
501 Rosemont-Ringoes Road

REPRESENTATIVE RUSH HOLT

Report To Monmouth County

FALL 2005

Dear Friend,

Families and individuals in Monmouth County are meeting a range of daily challenges. Each of us is trying to strengthen our communities, provide for our families, and prepare for the future. I am happy to have this opportunity to update you on some of the issues in Congress that affect people here in New Jersey.

I continue my efforts on the House Education and Workforce Committee to make college more affordable for families of hard-working students. I am also working to make K-12 education more robust by promoting math, science, and foreign language education. For those who are already employed, I have given a great deal of effort to improve pension security, prevent job loss due to unfair trade, and provide life-long learning opportunities for employees looking to change careers or move up the ladder.

As New Jersey's only representative on the House Intelligence Committee, I continue my work to prevent terrorist attacks and to support our servicemen and women around the world. In Iraq and Afghanistan, our troops are performing bravely and admirably. We owe it to them to provide the support and resources for them to do their job, as well as to begin bringing them home safely. Supporting our troops includes caring for all our veterans, new and old. That is the least we can do to repay their sacrifice.

I hope you find the information in this newsletter useful. I invite you to attend one of my upcoming community meetings, listed on the back page. In order to help me understand your concerns, I hope you will contact me by letter (address below), e-mail (through my website at www.holt.house.gov), or phone (toll free at 1-87-RUSH-HOLT).

Thank you, and I look forward to seeing and hearing from you soon.

Sincerely,

Rush Holt
Member of Congress

The Future of Fort Monmouth

www.holt.house.gov

On August 24th, the Base Realignment and Closure (BRAC) Commission delivered disappointing news for the people of Monmouth County and for our soldiers bravely serving around the world. The decision to close Fort Monmouth will have serious effects on our military's research and development, and on our state's economy. Perhaps most disturbing is the effect that it will have on soldiers who are currently serving abroad who depend on electronic sensors, communications, and computers for their safety and effectiveness. The diminished capacity and workforce turnover

that will result from this decision are effects that we must work to mitigate.

Since the Pentagon released its list in May, I have worked with the New Jersey Congressional delegation, state and local officials, and Fort Monmouth leadership to keep the Fort open. Though the decision is now final, I want you to know that my commitment to Fort Monmouth and the Fort Monmouth Community remain. I will continue to work with the Save our Fort Committee and all interested parties to develop plans for a smooth transition for the employees, families, and businesses tied to Fort Monmouth.

There will be much discussion and planning for what to do with the land that the Fort now occupies. Perhaps even more important than the land, however, is the scientific and technical infrastructure that has been critical to New Jersey's economy and well-being. We must make sure that our innovative industry and expert workforce are not lost. ▶

Rush confers with U.S. Army Generals about the strategic importance of Fort Monmouth for military and civilian research and development (R&D).

Safe and Efficient Transportation

Serving almost four million New Jerseyans in 2004, Amtrak is a vital part of our state's economy. I believe the federal government needs to do more to ensure that our mass transit systems are safe, secure, and reliable. That is why I am a cosponsor of the Rail and Public Transportation Security Act (H.R. 153), legislation that would provide a comprehensive plan to address vulnerabilities in security of freight and passenger rail transportation, including security screening, infrastructure upgrades, and more secure transport of hazardous materials.

A reliable mass transit system also requires reliable funding for Amtrak. Earlier this year,

President Bush proposed eliminating federal support for Amtrak, which would cause calamitous economic, traffic, and environmental consequences in New Jersey. Congress can restore federal support for Amtrak, and I will continue to fight for full funding as the appropriations process moves forward.

In my continuing effort to ease traffic congestion and decrease commute time, I was pleased that the recently-passed highway bill contained vital assistance for Monmouth County. Specifically, I was able to secure \$1.6 million for construction of a bus facility in Freehold Township, \$1.6 million for realignment of the Route 35/36 intersection in Eatontown, and \$800,000 for replacement of the Laurel Avenue bridge in Holmdel. ▶

Back to School: Higher Education for the 21st Century

www.holt.house.gov

Families in Monmouth County, which is home to Monmouth University and Brookdale Community College, know the value of education. As a member of the House Education Committee, I am working to ensure that the federal government is doing all it can to make college education more affordable.

Every five years, Congress has the opportunity to rewrite higher education laws to help students and families. Unfortunately, a budget resolution passed earlier this year to provide for domestic and international programs and for tax cuts has mandated cuts of \$9 - \$11 billion to student aid programs over the next five years. This is a terrible mistake that I strongly oppose. In order to mitigate the harm to college affordability, I successfully added amendments to the bill that will:

- Expand Pell Grant eligibility for community college students;
- Establish a scholarship program for math, science, and engineering students; and

Rush discusses his efforts to make college more affordable at a recent town meeting.

- Forgive student loans for students studying critical-need foreign languages.

Expanding college opportunity is critical to improving economic competitiveness, strengthening national security, and achieving our national priorities. Education for our workforce – young and old – is money well spent for our future success. ▶

Cleaner, Cheaper Energy

As crude oil hovers above \$60 per gallon, consumers are paying record high prices for gasoline and oil and gas for home heating. These prices affect our daily lives – families may skip a weekend trip, the daily commute takes a larger bite, and less disposable income is available for other necessities.

In August, President Bush signed a \$12.3 billion energy bill that even its sponsors acknowledge will have little, if any, effect on today's energy prices or our current dependence on foreign oil. Instead of investing in research for sustainable energy, the bill deepens our dependence on oil and gas. Having spent a large part

of my career working on alternative energy, it is frustrating that promising technologies like solar power, electric vehicles, and fusion are given short-shrift. This makes it difficult to achieve the long-term strategy that our public and private sectors need to research and develop reliable and renewable energy sources.

We can do better. A sustained commitment to investment in energy research could minimize our dependence on foreign oil, make our air and water cleaner, and provide a new basis for U.S. industrial leadership. That is why I am a cosponsor of the New Apollo Energy Act, which would provide for a comprehensive alternative energy strategy. ▶

DID YOU KNOW?

Small businesses account for half of our domestic product and three-fourths of new jobs created every year. Rush has been working on ways to decrease the cost of health premiums and protect federal loans for entrepreneurs so that small businesses in New Jersey can prosper and expand.
